OBJECTIVE

- Aspiring Final-year BCA student with hands-on experience in programming languages seeking an entry-level position where I can convert my classroom learning and practical coding skills into reliable, user-focused solutions while growing alongside an experienced engineering team.Passionate about designing,developing. Eager to leverage analytical skills and creativity to contribute to projects in the tech industry.

Education

- **Vivekanand Kendra Vidyalaya, (NEEPCO) umrangso.**
  Class X
  96.8%   **Passing Year- 2020**
- **Vivekanand Kendra Vidyalaya, (NEEPCO) umrangso.**
  Class XII
  89.8%   **Passing Year-2022**
- **NERIM Groups of Institutions**
  Bachelor's of Computer Applications (BCA)
  8.53 CGPA (upto 5th semester)   **3rd year, final semester (currently)**

Skills

- HTML
- Cascading Style Sheets(CSS)
- javascript
- MySQL
- php
- C
- C++
- OOPs

Projects

- **Festivals of Indian communities(FESTIVE FUSION)**
  Developed a front end website named "FestiveFusion" showcasing the cultural richness of festivals celebrated by different communities. Designed to provide information, visuals, and historical context on diverse cultural practices. Utilized HTML, CSS ans javascript to create an engaging, user friendly experience. The site features include articles, beautiful image sliders, card layouts, pop out modals.

  GitHub : FestiveFusion
- **Hotel Management System (SERINITA SOLARE) .**
  Built an interactive and responsive Hotel Management System using HTML, CSS, Bootstrap, JavaScript, PHP, and MySQL. Features include room booking, customer registration, and an admin panel for managing reservations. Designed with a user-friendly interface and mobile responsiveness to enhance user experience.

  GitHub: Hotel Management System
- **Banking System - Software Development**
  Banking System is based on a concept of recording customers account details. Here the user can perform all the tasks like creating an account, deposit amount, withdraw amount, check balance, view all account holders detail and close an account. All the main features for banking system are set in this project. Banking System is developed using C++ Programming Language and different variables, strings have been used for the development of it.

GitHub: Banking System
- **Movie Recommendations System.**

  Movie Recommender System – Built a content-based movie recommendation system using Python, Pandas, and Scikit-learn. Implemented cosine similarity to suggest similar movies based on user selection. Designed an interactive web interface using Streamlit for seamless user experience.
